

Windows Enterprise Announcement

July 21, 2009 – WINDC1 Upgrade Complete

The Windows Enterprise Domain Controller "WINDC1" (windc1.iastate.edu, 129.186.6.1) has been upgraded to new hardware and a new operating system today (July 21, 2009, Tuesday). The process was complete at approximately 7:55 PM.

This completes the domain controller hardware and OS upgrades. The final step in the upgrade of the domain is to switch it to "Windows Server 2008 Functional Mode". Dates for this will be discussed in the upcoming CCSG and WinAdmin meetings. A tentative date (well ahead of the start of Fall09 classes - probably early August) will be announced soon. Watch for further posts.

For current Windows Enterprise Domain upgrade status see:

Questions

Report any problems/concerns to the Windows Enterprise Admins at its-ad-admins@iastate.edu. Discussion of issues is always encouraged in the WinAdmin and CCSG support lists so other IT admins can be made aware of them and possibly assist in solving any problems.
