

Windows Enterprise Announcement

July 2, 2015 – Bang-accounts Moved to Protected OU

July 1, 2015 was the announced date that all bang-accounts would be moved to a container outside an OU manager's control. That action has been performed.

Background on this action:

In May 2014 ITS announced the start of a year-long phase-out of bang-accounts in Active Directory. See:

Since that time ITS has issued several reminders via email to the major support lists, email targeted directly to the areas using bang-accounts, and announcements in the WinAdmin and CCSG meetings. At the April 28, 2015 CCSG meeting a schedule was announced for the final end-of-life process. See:
