

Windows Enterprise Announcement
Annual Network Cleanup
May 4, 2005

The annual network cleanup process is scheduled for May 9. Part of this process is the deletion of all NetReg registrations for *.student.iastate.edu and *.visitor.iastate.edu domain names and the reassignment of IP numbers in the residence hall system. When the residence hall IP numbers are re-assigned, users will lose all network connectivity until they re-register through [NetReg](#).

In addition, there may be a few brief outages in NetReg, DHCP, and DNS service as these are reconfigured and restarted. The WINS servers will also have all *.student.iastate.edu and off-campus addresses flushed.

If you have questions, contact the Solution Center by phone at 515.296.6000, email at solution@iastate.edu, or in person at 195 Durham Center.
